

A Thanksgiving Message from.....

Thanksgiving Day is a cherished holiday known for its focus on harvest celebrations and giving thanks for the year's blessings. Throughout history, it has played a significant role in fostering alliances, such as between the Wampanoag and settlers. It also served as a unifying moment for our great nation, helping President Lincoln heal divisions during the Civil War in 1863. Additionally, Thanksgiving has historically stimulated economic activity, even during challenging times like the Great Depression in 1939. Thanksgiving is indeed a time to come together, foster understanding, and practice love and grace towards everyone, including family and those we may find difficult to accept. In our current social turmoil, let us all join together this Thanksgiving to celebrate our commonalities, listen, and try to understand each others' perspectives. Above all, LOVE one another, your family and your enemies, and give a large serving of Grace to all.

Our offices will be closed November 27-28 for the holiday.

We wish to express our gratitude for your business this year, and are grateful for our continued partnership as we move forward into 2026.

Here at Trendsetter, we value family and life balance most of all: for our employees and for our customers and suppliers. Without this balance it can be hard to keep a true focus on what matters most: compassion, happiness and a positive outlook.

Here's to enjoying time off, and putting differences aside to create happy memories!

With Grateful Hearts -

The Trendsetter Electronics Team
